

## **Mechanical Automation Design and Intelligent Manufacturing**

Guest Editors:

**Prof. Dr. Dan Zhang**

Department of Mechanical Engineering, The Hong Kong Polytechnic University, Hong Kong, China

**Prof. Dr. Zhongbin Wang**

School of Mechanical and Electrical Engineering, China University of Mining and Technology, Xuzhou, China

**Prof. Dr. Wei Tang**

School of Mechatronic Engineering, China University of Mining and Technology, Xuzhou 221116, Jiangsu, China

Deadline for manuscript submissions:

**15 January 2025**

### **Message from the Guest Editors**

Dear Colleagues,

A lot of scientists, engineers, and researchers are interested in Mechanical Engineering and Automation Science. It is the main motivation for this issue. Authors are welcome to submit papers in the following fields, such as mechanical design and method, digital design and topology optimization, functional surface interface technology, mechanical system dynamics and fault diagnosis techniques, advanced manufacturing method, collaborative robots and industrial robots, artificial intelligence technology, soft actuation and sensing, theory and application of multi-body dynamics, unmanned system design and application, automation science and technology, system recognition theory, networked system, intelligent measurement technology, analysis and synthesis of complex systems, etc. We believe that the issue will provide a wonderful chance for authors to promote their latest scientific research achievements and update the knowledge base of this research field.

Prof. Dr. Dan Zhang

Prof. Dr. Zhongbin Wang

Prof. Dr. Wei Tang

## Message from the Editor-in-Chief

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
